

Installation

Download and place brushes in DropBox, iCloud Drive or Google Drive.

In the Procreate app open the Brushes Palette by selecting the brush symbol in the top right hand corner.

Once in the Brushes palette select the '+' symbol in the top right hand corner.

Select 'Import' and locate the brushes (remember where you have stored them).

Select the brush you want to import.

For more info on how to import single or multiple brushes at the one time go to YouTube, there are many videos detailing the process.

Terms of use

I have spent many hours crafting these brushes. Please show respect and do not (under any circumstance) redistribute these brushes for use or for sale. They have been licensed to only you. They may not be resold, even if changed considerably.

As owner of these brushes, you may use them for an infinite amount of personal or commercial work.

Please read the following in regards to your license for this product. The product you have purchased is considered an 'Add-On'.
